

NOTICE REGARDING OJIBWAY SHORES ACCESS

The Ojibway Shores property located between Black Oak Natural Heritage Park and the Detroit River is recognized as extremely significant environmental land providing habitat to rare fauna and flora as well as numerous species-at-risk.

Due to the significant damage done over the past year, the property is currently closed to the public in order to allow the area to environmentally regenerate. Notice is posted on the property indicating no entry.

Future public use of the property is currently under consideration by our Board and we would be pleased to hear from any interested parties on future access. Please send comments by email to wpa@portwindsor.com

The Windsor Port Authority asks that the closure be respected and seeks your cooperation and assistance in protecting the property by not accessing the area until further notice. Future notices will be posted on the Port Authority website at www.portwindsor.com.

The area bordered in **RED** is the Ojibway Shores property
